### Terms of Acceptance

In order to provide for the most effective healing environment, most effective application of chiropractic procedures and the strongest possible doctor-patient relationship, it is our wish to provide each patient with a set of parameters and declarations that will facilitate the goal of optimum health through chiropractic.

To that end, we ask that you acknowledge the following points regarding chiropractic care and the services that are offered through this clinic:

- A. Chiropractic is a very specific science, authorized by law to address spinal health concerns and needs. Chiropractic is a separate and distinct science, art and practice. It is not the practice of medicine.
- B. Chiropractic seeks to maximize the inherent healing power of the human body by restoring normal nerve function through the adjustment of spinal subluxation(s).
- C. The chiropractic adjustment process, as defined in the "law of this jurisdiction" involves the application of a specific directional thrust to the spine.
- D. is a safe, effective procedure applied over one-million times each day in the United States by doctors of chiropractic. Like all forms of health care, while offering considerable benefit, chiropractic may also provide some level of risk. This level of risk is minimal, yet injury can occur in rare cases.
- E. A thorough chiropractic examination and evaluation is part of the standard chiropractic procedure. The goal of this process is to identify any spinal health problems and chiropractic needs. If, during This process, any condition or question outside the scope of chiropractic is identified, you will receive a prompt referral to an appropriate provider or specialist, according to the initial indications of the need.
- F. Chiropractic does not seek to replace or compete with your medical, dental or other type(s) of health professionals. They retain responsibility for the care and management of medical conditions. We do not offer advice regarding treatment prescribed by others.
- G. Your compliance with care plans, home and self-care, etc., is essential to maximum healing and optimal health through chiropractic.
- H. We invite you to speak frankly to the doctor on any matter related to your care at this facility, its nature, duration or cost, in what we work to maintain as a supporting, open environment.

I, \_\_\_\_\_ have read and fully understand the above statements. I understand there may be risks associated with chiropractic care and give my consent to the examinations that the doctor deems necessary, and to the chiropractic care including spinal adjustments, as reported following my assessment.
